-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☒ Other: Detailed Action.

DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed 5/24/04 has been received and made of record in the application file wrapper. Note the acknowledged PTO-1449 form enclosed herewith.

Specification

2. The disclosure is objected to because of the following informalities:

Page 7, line 17, "28" should read --12--.

Appropriate correction is required.

Specification

3. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: the phrase "...tension strap lever" used throughout the claims lacks proper antecedent basis in the specification.

Double Patenting

4. Claims 1-3, 5-7 and 9 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-3, 5-7 and 10 of copending Application No. 10/420,344 ("the '344 application"). Although

Art Unit: 3743

the conflicting claims are not identical, they are not patentably distinct from each other because as can be clearly seen from claims 1-3, 5-7 and 10 of the '344 application are of the claimed structural limitations of claims 1-3, 5-7 and 9 of the instant invention are recited except the following:

1) The preambles of claims 1-3, 5-7 and 9 recite either "A knee brace" or "The knee brace" while the preambles of claims 1-3, 5-7 and 10 of '344 application recite, "An orthosis" or "The orthosis. The applicant should note that "a knee brace" is an "orthosis", therefore the "orthosis" language is not patentably distinct from the "knee brace" language.

2) Line 12 of claim 1 of the instant invention recites "said tension strap engaging said compression member", while line 12 of claim 1 of the '344 application recites "said tension strap connected to said compression member". The "connected to" language is not patentably distinct from the "engaging" language because if the tension strap is connected to the compression member than it necessarily engages the connecting member.

3) Line 2 of claim 6 of the instant invention recites "said tension strap engages...", while line 2 of claim 6, recites "said tension strap is connected...". Again the "connected to" language is not patentably distinct from the "engaging" language because if the tension strap is connected to the compression member than it necessarily engages the connecting member.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
